UNDERWEAR

UNDERWEAR LUST

The very first item of underwear was worn by the very first man. That fig leaf that Adam slapped on to cover himself was just a start. The first jock straps were probably devised by cavemen for protection during hunts. The small twisted pieces of material used by the Roman and Greek athletes during the start of the games were soon discarded, as most of those were played fully nude, giving rise to the very first of the underwear fetishes. Those scraps of material were collected and sold by enterprising trainers to the ladies of the times as trophies. (To be sure, there were a few men who bought and valued them highly.) Today's permissive mores, dating back, no doubt, to the removal of Clark Gable's shirt in "It Happened One Night," revealing a bare chest, underwearless, gave quick rise to the soon fully unadorned male nude. Still, even now, there are those who think of the barely covered body as far more sexy than the fully exposed one. There is definitely a trend back to this direction. A recent ad in the underground papers, offering used jocky shorts and jock straps, finds its' young athlete advertiser flooded with requests. Perhaps we've become jaded by all those hard cocks, sticking out at us from the pages of magazines. This volume is to answer all the requests for the young male, in his shorts and the young athlete, in his jock strap, with their firm young malehood, full, stiff and completely outlined under those sexy garments.

THE LURE OF JOCK STRAP

Unlike the changes underwear has gone through, jocky straps have always been pretty much the same. And, have always been a big turn-on for many people. Just the thought of those tight, elasticised cotton pouches holding heavy nuts and big cocks made them an immediate hit. Even the early photographers of the male tried to emulate them with the posing straps, not daring to really photograph a model in a real jock. The first photos of boys in jock straps were a sensation and sold out the issues of the magazines they appeared in immediately. Those young men, clad in jocks, called to mind all those hot, young sports stars that filled so many dreams and fantasies. Soon, in an effort to increase sales still further, those young cocks got more and more erect under the clinging jocks. It wasn't long before they were popping out from under the sides in all their stiff fullness. That was soon followed by full nudity, then total erections and, finally, full action duals.

Still, the training of those first experiences stuck with many who were attracted to the image of a young man in his jock strap. One man in Los Angeles collects them. He has a huge assortment of them from many major football and baseball clubs. Naturally, he's not willing to reveal how he came by them. This is not all that unusual. Many men are turned on by a worn and well used jock. Three young men who attend college in the Mid-West support themselves by selling their, and other members of their football team, used jocks through the mail. They were only discovered when so many jocks turned up missing from the gym. The market was scattered throughout the country and did earn them a lot of money. The ones they masturbated into and filled with hot, young male cum, sold for as much as twenty-five dollars!

Even today, in the time when you can see and buy almost anything at all on your local news stand, the image of a young stud in a tight, revealing jock strap is still one of the sexies of all photographs for many, many people.

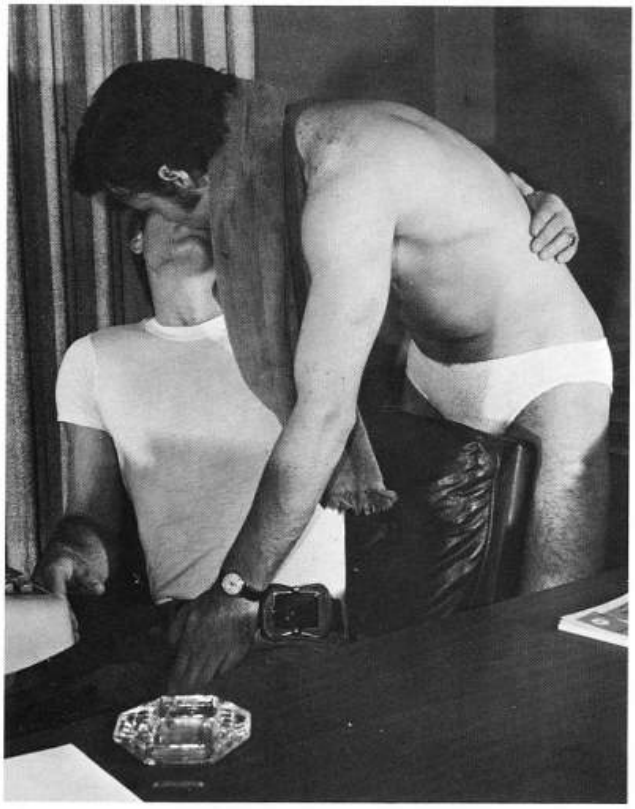
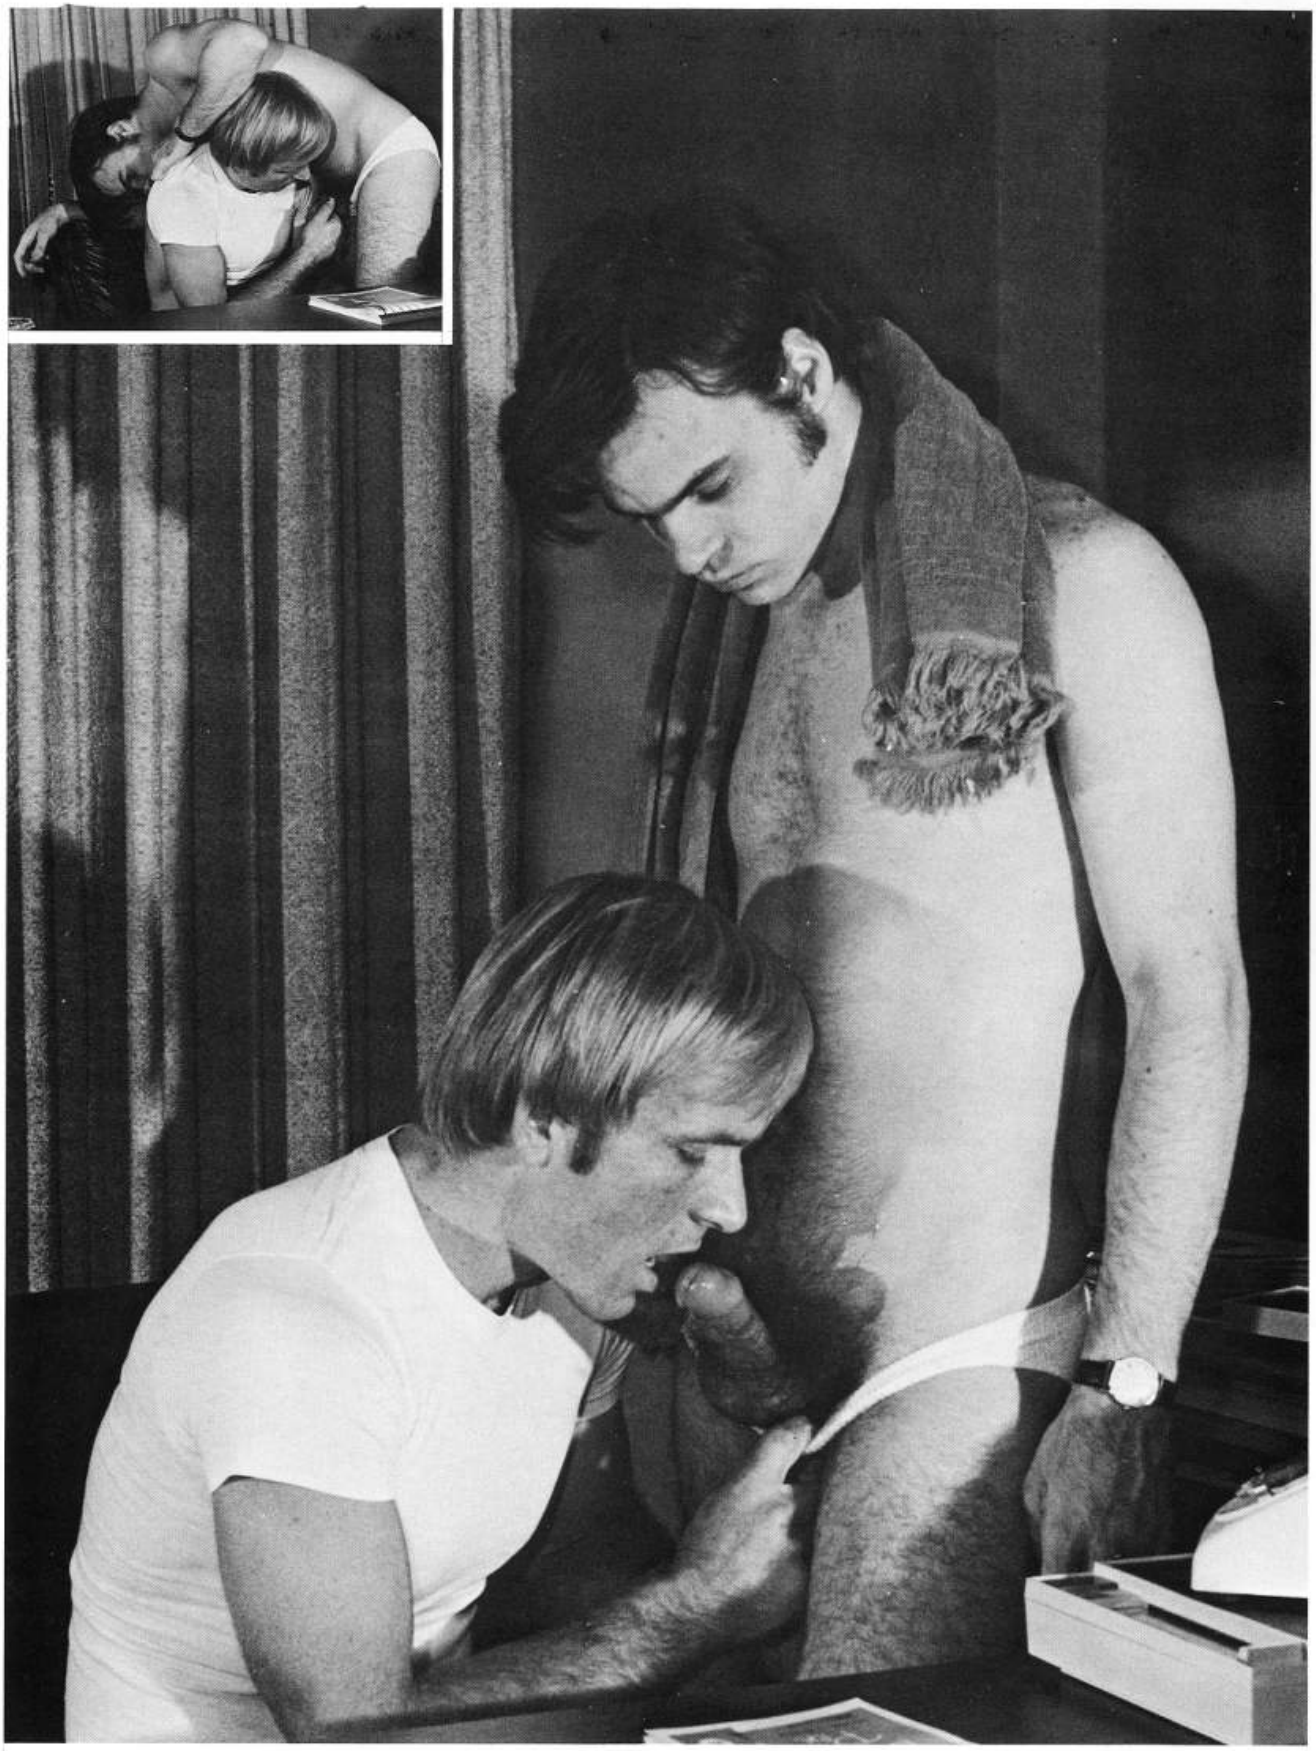
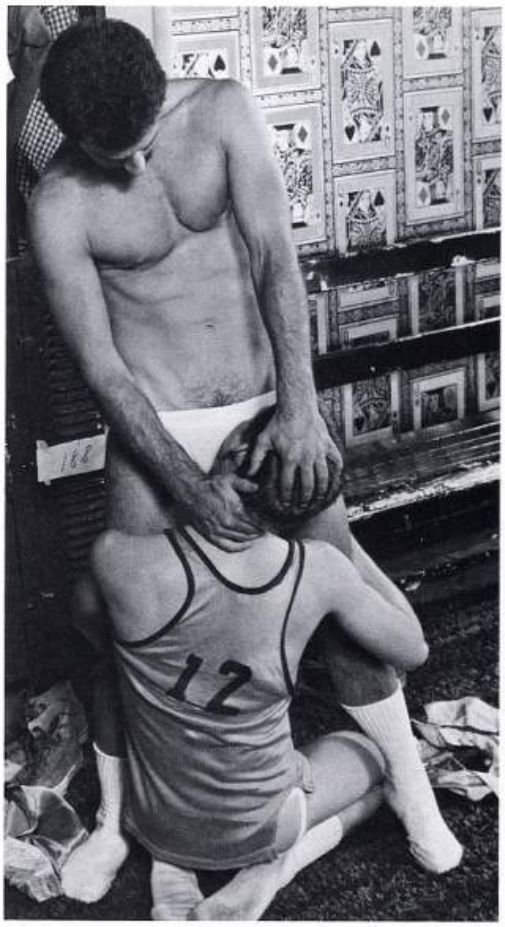
FRESH FROM THE SHOWER...
IT HAD TO BE HAD!





EAT MY HOT CROTCH



No matter how much you are turned on by the thought of it, the passion for those close fitting undergarments worn by men can only be thought of as a recent development, (Discounting the Greeks and Romans). There is just nothing romantic or sexy about any of the things that were worn by the Victorians and before, while one would have to really be attracted to the idea of underwear to find those scratchy long-johns, favored by the turn of the century man, attractive. The sexy, revealing briefs that came to the fore in the Twenties changed all that. Suddenly, we had revealing, sexy underclothes. The movies of Hollywood were quick to realize this attraction and cashed in on the sexy appearance of them. Soon all the leading men of the period were seen in them in both films and publicity stills, along with those tight fitting, cock revealing bathing suits that were scandalizing the country.

Even today there is still a great deal of turn-on involved with such clothing. In a recent catalogue from a major mail order house, the photo of a young model in boxer shorts with his young cock fully outlined, made it an immediate sell out. Strange, when you consider how much fully nude, fully erect cock is on view in the local news stand. But then, not so unusual when you consider that the people who are turned on by that young catalogue model are the same ones who were buying magazines of young men in tight, form fitting posing straps and were really turned on when these same young men appeared on the pages of their favorite magazines clad in underwear! It was a bit like that one guy you grew up with and were really attracted to, but knew could never be had, the one that was always just out of reach. For him, just one brief look of his tight fitting jocky shorts was almost enough. It surely was enough to keep all your fantasies going and your interest alive.
